Sketch of 'Archipelago' installation, by Nic Evans

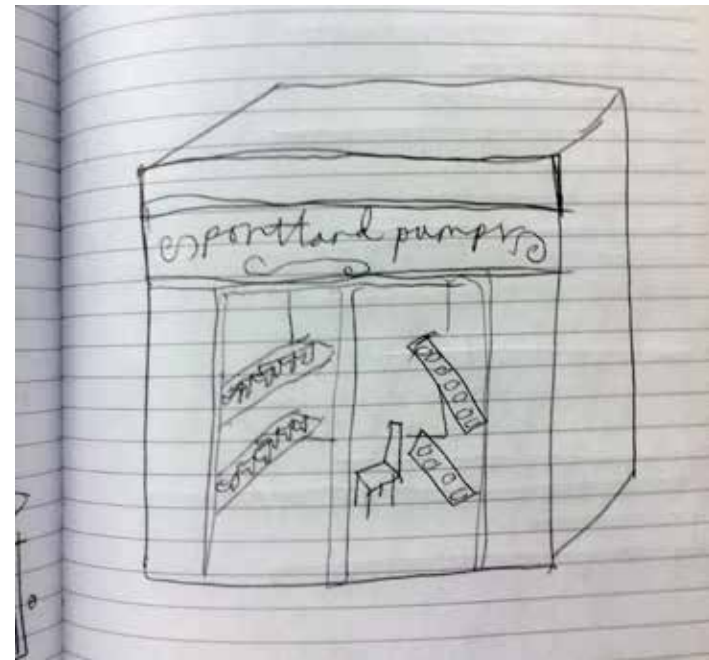

Dollhouse Designs for 'Archipelago' sculpture

The production of dollhouses and the miniature are a way to make life and the world around us safe and controllable. In these uncertain times Portlanders feel drawn to these playful representations of a civilized, Utopian world, and decided to build a large sculptural dollhouse together. As Portland is an island, all our ideas and designs for a dollhouse came together to form a jumble of an archipelago. Topped with our signature lighthouse to warn off approaching vessels, our sculpture will show our individual and composite worlds enmeshed together.
